MAVI POWER STEERING

power assisted steering system

The power-assisted steering system for outboard engines **MAVI POWER STEERING™** provides better sailing performance, allowing effortless steering in any sailing condition. MAVI POWER STEERING™ by lightening steering loads provides a comfortable safe and simple driving system.

Eliminates steering loads at the steering wheel

BLDC 12V IP67 motor

Provides instant manual backup in case of power failure

High efficiency power unit

Low noise, silent pump

Equipped with control panel

Steering pump available in three different displacement sizes

Compact design

Kit EPA-01 | SYSTEM KIT COMPOSED

POWER UNIT

- BLDC 12V motor - max pressure 35 Bar
- Relief valve
- P and T ORB fittings ½ 20 UNF
- Semi-transparent 2 litres oil tank
- IP67 waterproof - suitable for wall or floor mounting
- 4.5 m (15 ft) wiring harness to control panel and battery included
- Control panel with safety switch ON/OFF

STEERING PUMP

- Available in three different displacement sizes: 32 cc (1.95 cu.in), 40 cc (2.44 cu.in) and 50 cc (3.05 cu.in)
- 3/4" tapered shaft
- Built-in relief valves
- Provides instant manual backup in case of power failure
- Corrosion-resistant painted body
- Waterproof

HOSES AND FITTINGS KIT

- Fittings kit
- 5 lt hydraulic oil
- 2 x 7,5 mt SAE 100R7 3/8
- 2 x 5 mt SAE 100R7 3/8
